Subject: Midcoast council rate rise

To Whom it may concern,

We object to the proposed rate rise as it will impact us financially and we were told that the rates would be frozen when the merger went ahead.

Midcoast council is saying that 80% of the population will be able to afford it...REALLY!!! what a joke most of the population are going to struggle to be able to pay the rates with the cost of living and now the electricity going up.

They said it would be cheaper to run the council if they merged and now they want to increase the rates!!

Even the New Premier said it was a mistake to merge but she cant undo it so why should we have to pay the penalty for there mistakes.

Kind regards
Greg & Maria Tosh
