Submission: How can any council justify rate increases over and above CPI in today's disastrous economic times? Our combined pensions are just on \$700 per week, we are supposed to be able to live on that! It's hard enough to pay our power, gas, food bills every week [REDACTED] we can't afford! No wonder more and more people are finding themselves having to live on the streets!!! IPART should do what they are supposed to do...and that's look after the people of this country...not the bureaucracy that runs it□□□
