Price Increase when Warragamba Dam level low. This is no fault to any customer to Sydney Water. The proposal from Hawkesbury Council to have catchment tunnels placed beneath the dam, and locations back to the source that causes the flooding, filling of dam. This extra stored water, would come back into the dam, to keep it at good high levels. Why has there been no progress in this direction? The Federal Government needs to put tax payers funds into Sydney Water, to compensate all consumers in Sydney, because of their directive to increase migration into Australia, most come to Western Suburbs, Sydney, NSW. The infrastructure required to bring water to and remove sewerage from the new housing estates is the main cost to Sydney Water.
