Date of submission: Monday, February 29, 2016

Submission: I am a rural ratepayer in Lismore, the mostly rural city.

I am happy to pay a standing extra levy for biodiversity protection and management; the proposed BMS.

My understanding of life is that it underlies all cultural and economic activities; we rely on the rich global web of air water rock soil and lifeforms for our happiness and "success".

To budget for respect of the ecos is only sensible; and the majority of citizens want this ecological sustainability to be planned for, funded and implemented longterm and bigtime : )

I hope you will enable this SRV for BMS.
