Submission: I wish to lodge our objection to the proposed SRV as proposed by CHCC. My reasons are as follows. Councils consultations said NO and yet they moved without community support. We are a poor economic area and the average land value quoted by Council is way below what we are based on and we only live in a modest area. The Council is dysfunctional, passing a motion one day then someone lodging a rescission motion the next. Some Councillors are more interested in projects that they hope they will be remembered for rather than what is needed. Road projects that are constructed, especially roundabouts, are poorly designed wasting money creating bottle necks and traffic hazards and not serving the community as well as they should. Their attitude to road design is basically lazy. Council should be disbanded and an administrator appointed until their economic direction can be established by an independent authority. Thankyou for your considerations.
Regards Ian & Pam
