Submission: The City of Sydney Council is delivering all that it should and more in terms of services. It is also performing better than any other council. Why should it be forced to merge and be encumbered with other areas that its constituents do not wish to merge with and possibly degrade the service that is currently delivered? I am a voter for the Sydney City council area, state of NSW, and Commonwealth of Australia. I take my vote seriously and see this merger as a degrading of my citizenship right.
