Submission: City of Sydney council is doing great things for our area - they are accountable and efficient and our neighbourhood is better for it. There are many unanswered questions around amalgamation and surveys show the majority of individuals and businesses do not want it to occur. Quality of services will diminish and accountability will disappear. Our catchment area is already very large, making it any bigger reduce investment and our public projects will suffer. City of Sydney has a commendable track record for being proactive and productive - do not punish us.
