Submission: The city of Sydney Council is the most progressive, sustainable-aware, economically responsible and inclusive council Australia has ever had. Despite the conservative state governments attempts to remove the Independents from the State and the City's council, the people of Sydney have voted. We believe in city farms, cycle ways, trigeneration power, wider footpaths, fewer cars, inclusive social housing and the encouragement of artists and artisans within our community. The city is an eclectic community who have become a cohesive voice under the direction of Clover Moore. To amalgamate councils into monolithic businesses loses the very essence of local representation. Keep Sydney Council Independent and representing the people of Sydney
