Your submission for this review:

To whom concerned As a large irrigator on the Hunter River Singleton, growing fodder to support a 900-cow milking herd, which in turn support a staff of 25. It is unjust that WaterNSW can lodge an application for a 15-17% increase when inflation is running around 3%. I believe WaterNSW mandate is to be fully cost recovered, but the increase they want is anti-farming. WHERE DOES THE FOOD COME FROM!!! IPART should be looking at WaterNSW, to see where their failings are. instead of WaterNSW pricing us out of business. Just to have water for the Urban sprawl John Redgrove [REDACTED]
