The increase is not just an % as it will be higher due to inflation. And I guess the CEO is "only" on 800000 aud a year and that needs to be modified too. I suggest to look at different ways to modify, update processes and production. Just increasing the charges is poor business. I have to say for someone with a wage of 800K, sitting in an office, should lead and manage options, in stead of just increasing the fee. So what is/are the alternative vs. an increase in charges, I like to find that out in the meeting.  
Rgds, H
