Dear IPART

**OBJECTION TO Port Stephens Council Special Rates Variation**

I wish to register that I object to Port Stephens Council's ridiculous proposal to increase rates by 66% over 7 years.

My objections are as follows;

1. To my knowledge, none of the council members made any mention of large increases in rates prior to their election; they have no mandate to increase rates at this level.
2. Over 70% of submissions to Council's proposal were against the increase. Over 2,000 people made their voices heard. Council ignored every single one of these people. Thousands more locals have signed online and paper petitions. Local businesses are against this proposal. I am a local business and this is an additional expense we do not need.
3. There is, poor awareness about Council's proposed projects. This lack of awareness has been fuelled by Council changing amounts of money being allocated to projects, between when this proposal first went out for public submission, and what has been submitted to you.  
This includes \$25million less over 10 years for roads. Perhaps the 30% of people who indicated a willingness for a rate rise in the first round of consultation may have opted for no increase had they seen the most recent proposal from Council.
4. There is no evidence that any of the projects proposed by Council are 'needs'. Rather, they appear to be 'wants'. I agree that most of the projects would be nice to have, but none of them are essential to Council continuing to operate. Certainly almost everyone we speak with would be happy with the status quo rather than such a massive increase in rates.  
Council has, in recent years, demonstrated a sound capacity to fund large-scale projects without the need for a rate increase.
5. **The rates in this Council are already substantially higher than in many high income Sydney suburbs**, but most people in this council area have relatively modest incomes or are retirees. Wages are stagnant, power prices are soaring, and the cost of petrol, insurances, and consumer goods is only increasing. Cost of living is rising and I am one of many people who are already struggling.

6. Pensioners are already deciding between turning the heater on in the dead of winter, or not spending that money so they can pay bills. Parents are already deciding whether they can afford to buy bigger shoes to send their kids to school in, or whether they can afford a bigger school uniform. This is without a rate increase!

Port Stephens Council has ignored residents, and I ask that you listen to us when we say: this rate rise is unnecessary, unaffordable, and will cause extreme hardship for many. I ask that you reject this application by Port Stephens Council outright, or at least to a much lower level than what has been requested by council.

I am happy for my submission to be made public.

Thanking you

Ken Fletcher
