Submission: I do not support councils proposed increase in rates. Increases in cost of water recently is too high, and u have decreased the initial tier of water to a mere 75kl, then it jumps to over \$3.00 kl. It's just not fair to family's already struggling to pay every thing else No one wants to let there lawn and gardens die off in 40 degree heat but a lot of families will have to choose to either have a lawn or to have \$ to pay the next electricity bill. Please uhsc consider families budgets first. On the matter of the street scape upgrade, Again why put More pressure on the budget of families already struggling to pay for these upgrades, when we potentially get the \$\$ from the NSW government. Surely they have a duty to return a small proportion of the unbelievable amount of revenue they get from hunter valley mines to fund this project
