Submission: Coffs Harbour City Council has conducted on 3 separate occasions surveys to gather data on the acceptance of the special rate variation 2015/16. All 3 survey results indicated the majority of respondents are opposed to this special rate variation. I am of the opinion that our elected officials accept majority vote as what is acceptable. This is how they all want to be elected into office. So why on this subject is when the majority is opposed the councilors choose to ignore the majority. You can not play by the rules only when it suits you, it play be the rules all the time. These actions by the council highlights their inability to do the job they we elected to do, I call for their dismissal and replacement with an administrator.
