Subject: I support Ashfield council's special rate variation

I understand Ashfield Council has consulted with the community about the Spacial Rate Variation, which I support for the following reasons Ashfield pool is a popular and well patronised community facility and as such should be maintained for future generations.

It is within walking distance of many local schools who use it for swimming lessons and swimming carnivals.

It provides valuable recreational opportunities for retired people and the aged community such as aqua aerobics, as well as child care facilities allowing young mothers the chance to maintain their health and well being.

I strongly support it's preservation.

Megan McLean
