Your submission for this review:

Central Coast Council have restructured ,cut jobs, reduced services and Council still persist in the doing things in the same haphazard way that they always have .The State Government sent [REDACTED] with the intention of getting the Council out of the debt they had incurred .As far as I can tell, as an employee of Central Coast Council, That has been involved in this whole process ,to date. The problem I see is [REDACTED] here to save the State Government from having to bail us out and the debt we are in. The debt that, I feel was acquired by the merger that was inflicted upon us by the same State Government. My question is, why do the rate payers have to foot the bill ?
