I do not support this price increase. Community is already doing so tough with such a high cost of living and this increase will even make it harder for people meet end. If Sydney Water is in such a dire need of funds, State Government should step in and help/support them financially or otherwise. They have a responsibility to make it easier on community trying to live a simple life. Water is such a basic need of humans and it should not be made a luxury by increasing prices to such an extent.
