Your submission for this review:

Sydney Water's prices are already close to extortion - disgustingly high for services received. This proposal, with its MASSIVE increases is insane and should be resisted by consumers, to the point of demonstrations in the streets if necessary. My alternative proposal is that Sydney Water should be broken up, its senior & middle management paid off and kicked out to enjoy their huge, tax-payer funded pensions. Private consultants should be brought in to assess the mess current management have made and to devise & implement a new structure that actually serves its consumers, rather than ripping them off. Sydney Water is a Dinosaurs that should be consigned to the past, where it belongs.
