Your submission for this review:

I am a Resident at Mangrove Mountain and I object to the proposed price increase. We are not connected to sewage system and water supply. We are wholly responsible for maintaining and managing the storm water and waste water on our property. The average cost to us annually to ensure proper drainage and preventing any contamination entering the waterways of the Central Coast Water Catchment area would be in excess of \$6,000 and we bear the cost without seeking any contribution from The Central Coast Council. I believe it would be unjust to charge us for a service we do not receive. In fact, it is not unreasonable for us to seek compensation for our current contribution to managing and protecting the water catchment on our land.
