I would like to ask why you can tell us to pay more but can only recommend processes for CCC to be held accountable. This council has no credibility. I am a self funded pensioner and am not happy to keep getting increases to prop up a dysfunctional council. I also do not understand the maths applied for the cost to rise by \$200 + so many years at increase of \$49 per year plus cpi verses year one \$269 then future years cpi only? Surely the proposal for \$200 is far more expensive over a few years than the one off cost. I thought you were supposed to consider our financial survival and not just the poorly run business called CCC.
