Your submission for this review:

Hi, In their own information supplied in the proposal, they indicated the 30% of their customers are suffering with bill stress, yet they are proposing a more than 30% increase over 5 years, how can this even be possible? Is there an indication that families incomes are in for huge rise, being on a fixed income, I ask, how in the world is it expected that this can be affordable? Please reject their proposal. Regards [REDACTED]
