We here on the Woy Woy peninsula rely on bore water. Why should we pay? Council is crippling families and causing so much distress. There must be other ways this can be dealt with. Our services have been cut heavily, our landscape is overgrown and shabby everywhere! We have had floods for goodness sake! Why are we being penalised because of Governments inability to run a business? Its completely unfair! We are age pensioners and live on limited means. Cant even afford a holiday, or a nice dinner out. Please consider this carefully, and understand this region is mainly working class living hand to mouth, attempting to own their own home. Also please consider this, what will happen when rates go up? People are angry about this!
