

Hello

How could IPART approve a 31% increase in water rates from the [REDACTED] Central Coast Council?

I was on and at every IPART public hearing and even your personal running the public submissions could not believe how many complaints about water quality there still were in the Davistown / Saratoga area after 15 – 20 years from the original complaints

Rubbing stamping this is the lazy public service option

You should be ashamed of your incompetence and greed

Thanks

Best Regards
