The costing for looking after children who require lots of therapy is not what we are getting. If you look up how much it costs to raise a child it is what we are getting. These kids are above and beyond the normal kids!! I had 25 diagnosis in my house yet I get the normal payments! I should be getting therapeutic \$100k at least ! I had to get ndis funding so my kids could actually get the therapies they needed! This is ridiculous! The agencies get so much money for these kids and the hold it close. Its impossible to get anything off them! So that is the money value but what isnt explored is the non monetary value. The emotional toll on each member of the family that takes in one of these kids. Being emotionally harmed whilst trying to help a child ! Its the loss of wages the loss of super retirement and bio inheritance.
