This is huge Hike I am totally against of. The proposed changes will hike the prices by 54% in next 5 years and 77.15% if we consider 3% inflation rate. This is a significant change. Water is basic human necessity and shouldnt be taxed again in this way despite of everyone paying heavy taxes to the govt. We all understand the cost of running businesses will increase, but this is a proposed inflation of 77%. Its reaching almost double of what we are paying right now.
