Your submission for this review:

I am not against a price increase, but due to the current financial impact with cost of living am against the amount of increase sought. I think it would be fairer for all if there was an agreed amount collected as a water levi that was attached to a tax return, That way the costs are born by all taxpayers, not just homeowners/rate payers. The levi would need to have a start and stop date for collection, and should not become an automatic stream of revenue
