Well what a joke Sydney water is becoming. Now let me get this right you want to up grade pipe lines in Sydney . Well Im on Sydney roads every day and I see pips leaking on all different roads and one that comes to mind is Parramatta road out side of Harvey Normans on parramatta road and this has been leaking for that long I lost count on the years. I feel that Sydney water should up grade the lines but they should address other problems first Like build the dam wall hire or put in place a second dam to take the pressure off from flooding . The other thing is the quality of drinking water . It seems to me that you are quick to spend money on upgrading the pipes but not quick to fix the main problems . . The NSW government take loads of out tax money but not doing much taking care of the problems at hand. I feel that 80% of government officers are top heavy ,So why dont they remove some staff and by doing this the government will have money to spend on the upgrade. I know this as I once worked within a government and I know how many hangers on in the government that do [REDACTED] . I also know that no matter what is said by anyone will be a waste of words but I do feel that the people of NSW should be heard and taken what is said .This is how I feel on this matter [REDACTED]
