Your submission for this review:

This application by CCC for increased pricing is a direct kick in the guts to its residents directly following the exorbitant rate increase. Both increases are sought with the sole objective of removing CCC from their debt which is due to their total mismanagement and incompetence of the previous administration. The rate payers should NOT have to bail out the Council. There are plenty of internal cost cutting measures that CCC could take to claw back some credibility with their finances. The rate payers are simply an easy target to hit instead of admitting their mistakes and be willing to fix things themselves. Also the fact that IPART have and are considering supporting these increases places no confidence in this organisation. IPART should be supporting the ratepayer not the applicant in his case.
