We as a family refuse to accept what Sydney Water is offering in terms of price hikes in the next few years. We are getting poorer by the day by the governments' inability to use tax revenue efficiently. To top it all, new price surges to the degree you are offering where public is affected, is not fair and acceptable . My suggestion and recommendation is using public money for useful projects so that it is not wasted. If anything , the water price should be adjusted by inflation. If the government is claiming that inflation is 3.4, then why not apply it to the water price as well. My concern is more and more people are being pushed to the point of poverty. We do not want to see more people on the streets and We do not want our children to live in constant hardship due to governments inability to provide sustainable environments. We hope that resonates with Sydney Water . By the way, hearing news about Sydney Drinking Water having carcinogens, also remind us the inability of Sydney Water to provide us healthy water. This is another issue that needs to be addressed soon. Thanks. [REDACTED]
