Your submission for this review:

I believe this outrageous and that Sydney water and the government are disconnected with the reality of cost of living, they need to find innovative ways to reduce bills and deliver growth and renewals, anyone can say give me more money, only the efficient operators can tell you I will deliver more with less money. As it stands we are in the top 20 highest taxed countries in the world please look for efficient ways to spend that money and stop asking for more around every corner! If IPART has the customers interest at the heart they should ask for reduction in bills not an increase!
