In our retirement village we have an embedded network with Origin. . So we have no choice about supplier, our bills are all over the place; some couples in 2 bedroom places get quite small monthly bills eg under a \$100 dollars while others, single people in 2 bedroom units get bills of \$200. Both say they use similar amounts of electricity. Origen bills dont even come at a similar times in the month and now they aren't showing much detail either. If one complains long & hard, bills get slashed.
