Your submission for this review:

I find it difficult to swallow that water, electricity, gas, council rates, banks etc etc are all increasing charges at this difficult time of the problem we all have - THE RECESSION. The public is being pushed to the limit and to breaking point. It is about time your consumers should be considered concerning this long, long period of difficulty, not to mention COVID. IT IS VERY DISAPPOINTING THAT ALL THESE GOVERNMENT SERVICES WANT MORE THAN THEIR POUND OF FLESH! Please think of your community who are struggling and hurting to keep their families safe, healthy and unworried about their future with this extended and difficult situation. Even the Federal Government is not assisting their constituents.
