Submission: most important, please take into account when deciding on shoalhaven rates. While hearing that wage rise was 0.2 % and corporate profits are gigantic my neighbour driving a council truck arrives home 3.20 pm as usual. My pensioner rebate on rates is the same in \$s as 15 years ago. Council is " concerned" about the hardship for the low income population. This is insulting to me. I spent my working life having to stick to a budget, increasing productivity. Is this to much to ask of council ????
