Your submission for this review:

These data centres draining all the water are a threat to life The government has not built any dams for over 50 years De Sal plants are a failure The one at Kurnell when required was broken despite the contractors being paid to have it ready Ask yacht owners how unsuccessful they Now these data centres want all his water to run them The price of water for the individual house owner is over the top Its been going up and up The Waterboard used to have a 12 monthly fee but it got that expensive they now break it into 4 bills over 12 months That says it all
