Subject: Rate rise

As Sussex Inlet is a very active community and spend so much of our own time & money in providing so much for the community (so saving the council doing it) I don't see what we will be getting for our extra rate rises. Maybe you could save some money if your councilors & other workers were paid & only had the benefits of other business ie less RDO's less sick pay less other benefits that hard working business people & their staff have to live with. Don't raise our rates unless you want to start providing more for this community. Our roads are in a terrible state.
