WaterNSW needs to focus on the following The accounting system is disgrace for an organisation of it's size. We have over 20 individual bills to pay. we need to be able to consolidate these into one statement for linked accounts. Linked licences should be able to move water (general security allocation) between access licences in real time, no need for a transfer application. similar to moving money between bank accounts. The YCS environmental levy needs to keep up with inflation. This levy is incredibly important for our system and has widespread support throughout the community, it's a clear indication of the commitment the creeks community has in achieving good environmental outcomes, we are prepared to put our own money up.
