Submission: This is in regard to rates rises this year. I am not aware if this facility is available already, apart from Freedom of Information requests - but are you able to publish complete transparency of your finances and what happens to our rates revenue every year? Transparency will reinstate some faith into how the council is run and help the residents understand where their money is being spent. In particular, it will address why some of us don't have pavements outside our homes when prioritised against other requirements. Thanks
