Your submission for this review:

This is the most extraordinary transfer of wealth from the poor to the rich in the history of NSW. The contract should be torn up and the plant dismantled. Also users should be able to opt out of desal water. Climate change modelling shows Sydney will become wetter and also if the Warragamba dam wall is unfortunately going to be raised than the desal plant becomes redundant. There should be a state referendum on this issue, choosing either the dam wall raising or the desal plant.
