Your submission for this review:

The Central Coast Council should not get a 34% increase, any increase should be the maximum of the CPI. The reason is because the Central Coast Council have not spent previously IPART approved capital works and the quality of the water in Davistown, Saratoga and Yattalunga is terrible. It smells and has a foul taste and is often brown. Nothing has been done to rectify this for decades. They may have some some work, but we still have the issue. DO NOT rubber stamp this lazy [REDACTED], please.
