

Author name: S. Gannon

Date of submission: Monday, 9 December 2024

Your submission for this review:

My name is Stuart Gannon, from Deniliquin where I have a farming enterprise The proposed increase to water prices are disproportionate to the economy and an increased of any more than CPI is greedy and unfair What is the justification for the increases- will irrigators be getting any better services or reliability of water? Water prices proposed increased to 2029 of nearly triple is ridiculous and will have a significant impact on the viability of farming businesses
