Submission: There is nothing in the planning to help the residents of Bob's Farm. Marsh Road needs some serious work instead of the patch repairs that we currently get. Drainage is a huge issue and there are no plans to improve this for residents. We have been told that we can not repair broken levies and the floodgates situation means that ratepayers who happen to have floodgates near their property having to fund any repairs. It appears to me that the only thing council is prepared to spend money on is improving things for tourists not for ratepayers.
