Submission: we object to CVC SVA on a number of grounds: #CVC has not achieved any cost savings promised since amalgamation. #CVC cant balance their spending to their revenue. # Council still runs loss making ventures that could be privatised. eg. GFN airport, GFN regional art gallery, etc, #CVC remains a very large employer for the size of the council, # poor management by CVC of major works like GFN central works depot, # council promises no more borrowing, but keeps spending on things we could do without, eg upgrade to Yamba campground, GFN water park proposal. # council fails to make the tough financial decisions that would help them balance their budget, and avoid increased rate hardship on all its ratepayers.
