Submission: To ipart I find this application by our local council to be totally outrageous .If this rate rise is allowed . Our family will suffer serious financial hardship between Rates .Electricity. and Registration I feel we will not be able to afford to live in the Euorobodalla Shire and will most likely have to relocate back to Victoria as the overall cost of living is much less . We do love Narooma but I think this would find it unaffordable. I have also been advised a proportion of the is going towards salary increases and superannuation for staff (disscusting in this economic climate) for . I would also like to comment on the fact that when any planning permit is put forward to council by either private or business people they make it extremely difficult and expensive what gives them the right to charge these exorbident fees I have personally spent 35 years as a small business operater in Victoria and have not seen the waste that I see in our shire Please refuse this application so we can stay in narooma a place we would love to still call home.Many Thanks Graeme Cowley [REDACTED]
