To whom it may concern

My name is John Bisetto, I have a small irrigation property north of Griffith NSW. Water NSW proposed fixed charges increase on water is ridiculous. It is easy for them to put down on paper any price. Without justifying it. To put it into context, for someone on wages. Could you survive if the government put a 142% increase on your tax on your wage. You might survive, but I think you wouldn't move forward, maybe even go backwards. Common Sense would say use CPI, to keep up with inflation. and look at themselves to be more efficient. A 142% increase in charges would drive a lot of people off the land. Where do they think the money comes from. I notice in the proposed charges; the smallest increase is for people who don't own water and trade.

Please Independent Pricing and Regulatory Tribunal members , bring some common sense to this review of Water NSW

Yours sincerely

John Bisetto
