Submission: Comments:

- The document mostly goes on about cost savings by Water NSW in regards to their proposal, which doesn't really affect us
- The pricing proposals don't really change, however the telemetry pricing is interesting. I'll double check with Jason regarding the telemetry for the current meters, however there are rebates for meters that are connected to Water NSW's telemetry

Question:

- Will the telemetry charge be on a sliding scale? They provide examples of lower fees when a certain percentage of meters are connected to telemetry, and it would be good if our fees lowered as more meters are connected (e.g. when 26% are connected, it would then be lower once 31% are connected, etc.)
