Your submission for this review:

My Daughter went to another electrical Tetailer offering a cheaper rate per KWh, and when she got her first bill found that the total Price was actually 2 cents per KWh dearer than her previous Retaler, I honestly think that this is a form of Retail Price Maintenance by Proxy. is there some way that this can be prevented, either by The Poles and Wires, or The Retailer being forced to inform up front about this matter, I am not very satisfied that she could be taken in by such a Contrick, and that this should be a matter that is brought to Public Notice, prior to o tract being signed,.
