Is your dwelling a single house or part of a multi-dwelling structure (e.g. flats, units, town house)?
○ Single dwelling
○ Multi Dwelling
Background
The purpose of the proposal is to ensure equity in sharing the rating burden for Lane Cove. At present 46% of residential rate payers, predominately home unit properties, are on the minimum rate of \$538 contributing 21% of
rate income.
This means that residential rate payers living in houses contribute 79% of rate income. In the future with the majority of new dwellings being home units this disparity will widen.

This is despite all ratepayers having the same access to services and facilities provided by Council.
Under the proposal, minimum rates for apartments and units ONLY will increase by 7% per annum for the next five
(5) years.
The increase will be in addition to the normal rate cap increase each year which has been set at 2.3% for 2014/15.
This will mean that for 2014/15 the minimum residential rate will increase by 9.3%.
The proposal does not provide additional income to Council as ratepayers not on the minimum rate which are those in houses will receive a reduction in their rates.
