

06.02.02

The Chairman, IPART
PO Box Q290. QVB P.O.

The following is a letter endorsed last night, at our first meeting for the year, by residents of Bay Precinct, North Sydney Council.

The Bay Precinct would be very much in favour of the undergrounding of electric cables in urban areas of N.S.W and also in all new areas being developed - urban or country.

We understand that this would have to be an on-going process, but unless a start is made as soon as possible, we are only wasting more money on installations which perpetuate the present unsatisfactory situation.

We also realise that initial costs would be higher than present costs of installations but the continued reduction in maintenance costs would eventually offset this.

We would consider an increase in cost to us ~~us~~ individually as a percentage of our account total.

Yours faithfully
Judith Ambler. Sec. Bay Precinct

A letter was sent last week to you explaining the reason that our communication would arrive after the closing date for submissions due to the date of our meeting and asking that this be considered nevertheless.

J. Ambler.
