Sydney Water Draft Report – Correction to Wastesafe Charges

Applies to Review of prices for Sydney Water Corporation's water, sewerage, drainage and other services - From 1 July 2012 to 30 June 2016 – March 2012

Released 11 May 2012

We are correcting some minor errors in the recent draft report and determination for Sydney Water. The Wastesafe charges were calculated including GST in the report and determination. In the case of the Draft Determination, the prices had not been adjusted for CPI so that they are in \$2012/13.

However, the prices should have been published exclusive of GST.

This fact sheet identifies these errors and provides the relevant corrections. The corrections are as follows:

- ▼ Draft Determination, Schedule 5, Table 17 (Wastesafe Charges for Commercial Customers) – The \$/litre charge for processing grease trap waste should be \$0.13 in the first year of the determination period and $\$0.13 \times (1 + \Delta\text{CPI}_1)$ in the second year of the determination period. All other charges in this table should also have shown that CPI would be applied to them.
- ▼ Draft Report, Section 9.7.2 (Wastesafe Charges), Table 9.19: Draft Decision on Wastesafe Charges (\$2011/12) - The \$/litre charge for processing grease trap waste should be \$0.127 in the first 2 years of the determination period.

The corrected tables are shown below.
