## 1.7 List of IPART's draft recommendations

	Draft recommendation	Proposed response
	Allow councils to use CIV as an alternative to U	
1.	Councils should be able to choose between the Capital Improved Value (CIV) and Unimproved Value (UV) methods as the basis for setting rates at the rating category level. A council's maximum general income should not change as a result of the valuation method they choose.	Recommendation supported subject councils retaining the ability to choose either UV or CIV as its valuation method.
2.	Section 497 of the Local Government Act 1993 (NSW) should be amended to remove minimum amounts from the structure of a rate, and section 548 of the Local Government Act 1993 (NSW) should be removed.	Recommendation not supported. Councils should retain the ability to continue existing minimum rates as they minimise adverse impacts resulting from valuation fluctuations.
	Allow councils' general income to grow as the c	
3.	The growth in rates revenue outside the rate peg should be calculated by multiplying a council's general income by the proportional increase in Capital Improved Value from supplementary valuations.  – This formula would be independent of the valuation method chosen by councils for rating.	Recommendation supported.
4.	The Local Government Act 1993 (NSW) should be amended to allow councils to levy a new type of special rate for new infrastructure jointly funded with other levels of Government. This special rate should be permitted for services or infrastructure that benefit the community, and funds raised under this special rate should not:  – form part of a council's general income permitted under the rate peg, nor  – require councils to receive regulatory approval from IPART.	Recommendation supported.
5.	Section 511 of the Local Government Act 1993 (NSW) should be amended to reflect that, where a council does not apply the full percentage increase of the rate peg (or any applicable Special Variation) in a year, within the following 10-year period, the council can set rates in a subsequent year to return it to the original rating trajectory for that subsequent year.	Recommendation supported.
	Give councils greater flexibility when setting res	sidential rates
6.	The Local Government Act 1993 (NSW) should be amended to remove the requirement to equalise residential rates by 'centre of population'. Instead, councils should be allowed to determine a residential subcategory, and set a residential rate, for an area by:  – a separate town or village, or – a community of interest.	Recommendation supported.

	contiguous urban development, and it has	
	different access to, demand for, or costs of	
	providing council services or infrastructure

	merger areas are separate towns or villages, or	
	different communities of interest.	
	- In the event that a new council determines they	
	are separate towns or villages, or different	
	communities of interest, it should be able to	
	continue the existing rates or set different rates	
	for these pre-merger areas, subject to	
	metropolitan councils seeking IPART approval if	
	they exceed the 50% maximum differential. It	
	could also choose to equalise rates across the	
	pre-merger areas, using the gradual equalisation	
	process outlined below.	
	- In the event that a new council determines they	
	are not separate towns or villages, or different	
	communities of interest, or it chooses to equalise	
	rates, it should undertake a gradual equalisation	
	of residential rates. The amount of rates a	
	resident is liable to pay to the council should	
	increase by no more than 10 percentage points	
	above the rate peg (as adjusted for permitted	
	Special Variations) each year as a result of this	
	equalisation.	
	The Local Government Act 1993 (NSW) should	
	be amended to facilitate this gradual equalisation.
