Submission: "Dear IPART/ NSW government

Please do not retract the Feed in tariff or reduce the FIT. It represents the fair price for power being fed into the grid by rooftop solar and also allows more houses to be self sufficient .

Given it is also a cleaner form of energy vs thermal power we should be encouraging more of it through the feed in tariff being maintained at current rates

Pl do it cut or reduce tariffs ie FIT as i believe it would be detrimental in the longer run

Thanks"
